MORONY DAM RIVER ACCESS SITE CLOSED

The Lower Morony Dam River Access and access road will be closed immediately, and will remain closed until Nov. 1 due to construction by PPL Montana.

PPL Montana is performing power line and substation construction in the area, and the river access area will be closed because of safety issues. The access road into the site will be closed in the vicinity of Sulphur Spring Trailhead. General public closures remain in effect on most of the Northshore Conservation Easement, as well as Sulphur Spring Trailhead due to this construction, so the public is advised to avoid this area until the closures are lifted. Access to Ryan Dam remains open, but Ryan Island is closed for the season.

For more information contact Fish, Wildlife and Parks Region 4 office at 454-5840.
